The Honorable Warren E. Hearnes
Governor of Missouri
Executive Office
State Capitol Building
Jefferson City, Missouri

Dear Governor Hearnes:

It is with pleasure that I submit to you the Annual Report of the Missouri State Park Board for the year ending December 31, 1965, for your consideration.

You will note from this report that much was accomplished in the development and upgrading of all of our Missouri State Parks and Historic Shrines. Many projects were well underway or completed as of December 31, 1965. These many accomplishments were made possible only through the splendid cooperation of your administration and the State legislative bodies. We have also had excellent working relations with other state agencies under your direction.

It is a privilege to submit this information to you, and may I say thanks for the Missouri State Park Board, my staff and myself.

Respectfully submitted,
MISSOURI STATE PARK BOARD

Lee C. Fine

Lee C. Fine
Director of Parks

You are Always Welcome in Missouri's Scenic State Parks

COVER PHOTOS

(Top) The old Arrow Rock Tavern is a part of Missouri's historic heritage.

(Center) Excellent rainbow trout fishing is enjoyed in the Current River at Montauk State Park.

(Bottom) This couple is enjoying the excellent camping facilities in Roaring River State Park.

MEMBERS OF THE MISSOURI STATE PARK BOARD

Conn C. Winfrey
Chairman
Term Expires in 1965

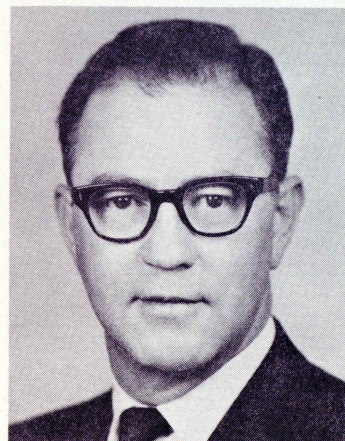

Randal N. Davis
Vice Chairman
Term Expires in 1965

Robert M. Wolpers
Term Expires in 1968

THE FUNCTION OF THE MISSOURI STATE PARK BOARD is to acquire, protect, develop and interpret for the inspiration, use and enjoyment of the people of the State a well-balanced system of areas of outstanding scenic, recreational and historic importance. These areas shall be held in trust in the state park system as irreplaceable portions of Missouri's natural and historic heritage, as well as provide nonurban recreation opportunities for the State's citizens and visitors that are normally beyond the responsibility of the State's political subdivisions. In determining these policies, the Board is cognizant of the interest of the public, the legislature and the state administration.

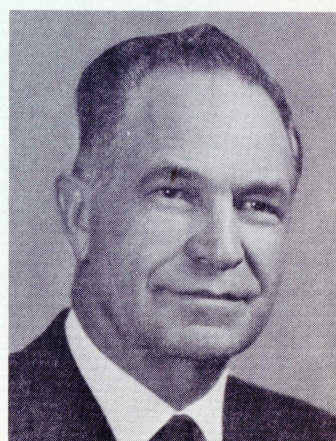

It is the desire of the State Park Board to expand the present state park system so that no citizen of Missouri will be over a one hour's drive to a state park, and intensify existing facilities in order to better serve the residents of Missouri as well as to further encourage tourism in Missouri.

Carter V. Blanton
Term Expires in 1968

Gerald B. Rowan
Term Expires in 1967

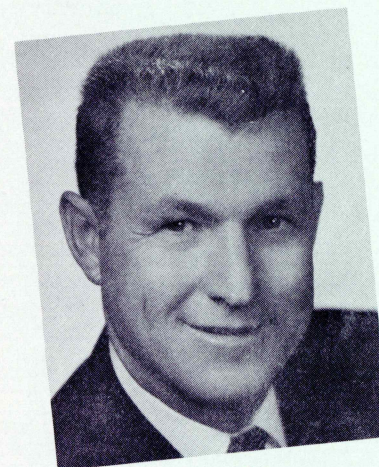

Hubert E. Lay
Term Expires in 1967

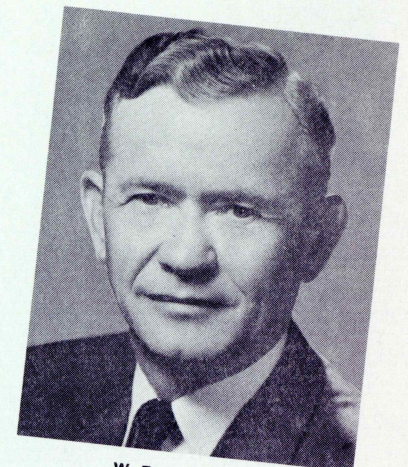

We are at the present time working with several other state departments in the development of a comprehensive Outdoor Recreation Plan projecting to the year 2000, as required by the Bureau of Outdoor Recreation, so that Missouri will be eligible to receive matching monies from the Federal Land and Water Conservation Fund for development, acquisition and planning. Missouri's share will be approximately \$2½ million to be divided among state agencies, counties and cities for outdoor recreation facilities.

The State Park Board is now using as a guide for development of existing parks and new areas the State Plan as accepted by the Bureau of Outdoor Recreation in order to qualify for matching grants from the Land and Water Conservation Fund.

The State Park Board is still using labor from the Training School for Boys from Boonville and labor of adult inmates from the Fordland Honor Camp. In addition, good use has been made of the Neighborhood Youth Corps wherever this labor is available.

Lee C. Fine
Director of Parks

W. T. Bollinger, Jr.
Assistant Director

CENTRAL OFFICE PERSONNEL

Hadley K. Irwin, Administrative Assistant

Mrs. Darline Haldiman, Administrative Secretary

C. Robert Belden, Chief Planner
Roscoe C. Collier, Engineer
Charles L. Robinson, Fiscal
Owen D. Johnson, Construction
Robert E. Davidson, Recreation
John H. Sturm, Procurement
Dan Ferrier, Inventory Control

Orval L. Henderson, Jr., Historian
Johnnie M. Olson, Engineer
Robert G. Haake, Maintenance
James W. Faulk, Asst. Construction
Louis Landwehr, Concessions
Frankie L. Phelps, Draftsman
Mrs. Nancy Longden, Bookkeeper

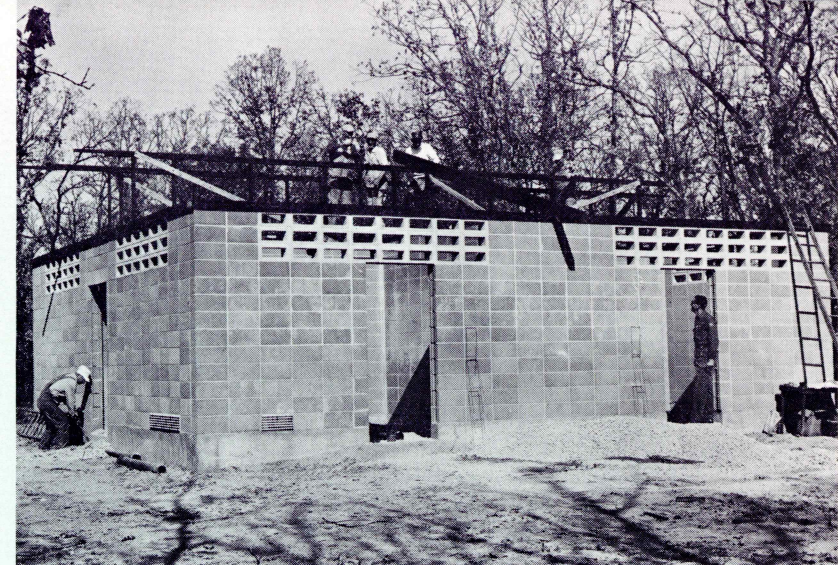

The State Park Heavy Construction Crew does most of the new road construction in our state parks.

Good use was made of the Neighborhood Youth Corps boys. This group is

clearing underbrush for a campground in one of our newer parks.

Our own Park Work Force has under construction 28 new modern rest rooms.

ENGINEERING

The Engineering Section completed the following major projects that will improve the facilities in several state parks. Two deep wells were drilled in Roaring River, three in Meramec, two in Bennett Spring and one in Graham Cave. Gravel wall wells were sunk in Arrow Rock, Van Meter and one in Big Oak Tree. Over one mile, or 5,965 feet, of new water lines was laid by our park personnel, connecting these new wells to existing facilities and those under construction. Six thousand two hundred sixty-five feet of new sewer lines were laid in several parks, connecting new rest rooms and cabins with ten new lagoons constructed either by our own work force or by contract through competitive bidding.

Over 2.9 miles of new roads were constructed by our own heavy construction crew, and 1.2 miles were constructed by contract. Our Construction Engineer oiled 9.2 miles of roads, and 33 miles of park roads were resurfaced by the Maintenance Section of the Missouri State Highway Commission.

Much of this new construction will not

be seen by the park visitors as the wells, water and sewer lines are underground. However, their contribution to the convenience and the satisfaction of knowing that the water and sanitary facilities are Division of Health approved will be greatly appreciated.

Also completed by contract under the direction of our Civil Engineer was Lake Lincoln in Cuivre River State Park. This lake will have about 85 surface acres of water and will furnish swimming, fishing and canoeing for all park visitors, especially the children using the four organized group camps in the park.

NEW PARK DEVELOPMENT

Various stages of development have been accomplished in all new parks, such as Graham Cave. The superintendent's residence and service area have been completed, most of the major drives completed, and parking areas developed. The overnight campground is now under construction and should be opened to the public in the summer of 1966.

St. Francois State Park now has a new superintendent's residence and service

area. Work is underway for camping and picnicking facilities.

At the Hawn Recreation Area some of the roads were constructed. Nature trails and picnicking facilities have been made available.

The old Watkins Woolen Mill has been restored and was opened to the public with guided tours in the fall. A new parking lot and entrance road were completed. Other park development will be accomplished in 1966.

NEW CONSTRUCTION

The major construction project in the state park system was the completion of the new lodge and dining room in Montauk State Park, which is being financed with revenue bonds in the amount of \$300,000. This addition will be a great asset to Montauk, one of the three popular state trout parks.

The year of 1965 was a banner year for new construction, especially in the area of modern rest rooms. The first building completed under our accelerated program was in Bennett Spring State Park.

Twenty-four other modern rest rooms were started and were or nearly completed by the end of the year.

Two new superintendents' residences were constructed, one in Graham Cave and the other in Pomme de Terre. Another was 60 percent completed in St. Francois. In two of these parks, Graham Cave and St. Francois, new service buildings were constructed.

Other construction included two new group camp barrack buildings in Camp Rising Sun in our Lake of the Ozarks State Park. Several other buildings were started, such as the enlargement of the store in Bennett Spring and the rebuilding of a double rental cabin in Montauk. Also completed was the restoration of the George Caleb Bingham Home in Arrow Rock State Park.

With the money appropriated by the 73rd General Assembly, a floating dredge was purchased and put in operation in the fall of 1965 on Big Lake in our Big Lake State Park. Although it will take some time to complete this project, a good start was made. Operation will start again as soon as weather permits in the spring.

ORGANIZED GROUP CAMPING

Organized group camping is one of the important operations of the State Park Board. It provides many youngsters the experience of an outdoor education and recreation in a natural setting that is not available in the cities. The number of camper days remain about the same from year to year, as the facilities are leased by non-profit organizations for most of the available days throughout the camping season. Any increase or decrease depends upon the number of campers the sponsoring agency brings to camp.

The policy of the State Park Board has been to continually improve these facilities which consist of camper cabins, dining lodge and kitchen, office and staff quarters. All but four camps have a recreation building. There are sixteen camps in all, and the average yearly number of camper days is about 158,000.

Some of the using organizations are Boy and Girl Scouts, Camp Fire Girls, 4-H Clubs, FFA, Public Schools, Churches (all denominations) and several United Fund Agencies, such as the American Red

Cross, United Cerebral Palsy Association, Sherwood Forest Camping Service, Kansas City Association of Neighborhood Houses, and the Young Women's Christian Association of St. Louis.

MAINTENANCE

The year of 1965 was another busy one for the Maintenance Section of the State Park Board. In 36 of our parks, not counting our historic shrines, the following major work was done:

Two hundred forty (240) buildings either were painted or stained using one thousand eight hundred sixty-one (1,861) gallons of paint and stain.

Sixty-three (63) buildings were re-roofed using seven hundred and four (704) squares of shingles.

A total of two thousand three hundred ninety-seven (2,397) acres was mowed several times during the year.

Vandalism amounted to one thousand six hundred eighty-three dollars and seventy-two cents (\$1,683.72) during the

year. All of this damage either was replaced or repaired.

Through normal wear and tear many repairs had to be made on a large number of the 1,202 buildings maintained in our state parks.

Six hundred forty-one (641) picnic tables were built and painted to add to those in the campgrounds and picnic areas.

Special emphasis has been placed on the high standard we have established for cleanliness and neatness in our state parks. This phase of our operation consumes much of the time of our maintenance crews, and the work load increases as the park attendance increases.

It would be hard to estimate the number of tons of garbage, refuse and litter hauled to a land fill and covered.

INDIAN ARCHAEOLOGICAL PROGRAM

During 1965 the staff Archaeologist prepared a detailed plan indicating ex-

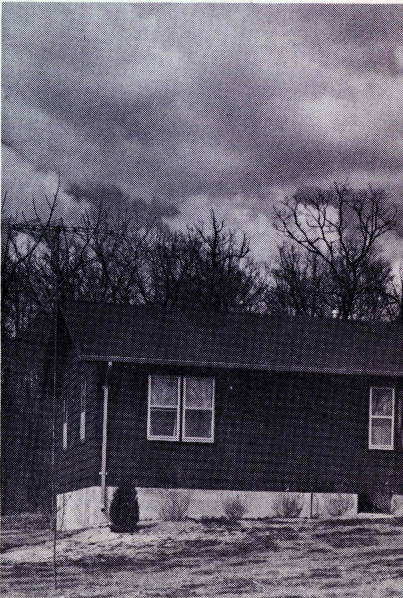

hibits to be incorporated in the proposed interpretative center buildings for Van Meter and Graham Cave State Parks. Visitor activity for the year was primarily centered around the Hamilton Field School at the Lyman Archaeological Research Center near Van Meter State Park. Total visitation amounted to 6,191, which was concentrated near the fall dedication of the new facilities. The Pease Dome Exhibit Shelter was painted prior to the fall dedication, and now contains three new and revised exhibits prepared during the summer field school session.

Additional activities in the Indian Archaeological Program consisted of cleaning up and planning to protect the cave in Graham Cave State Park. A seasonal archaeologist assisted park visitors in the interpretation of the Indian petroglyphs in Washington State Park. The nature museum in this park will be converted to an archaeological museum and will serve as the headquarters for the park archaeologist.

School campers plant trees as part of their lesson in conservation in a state park organized group camp.

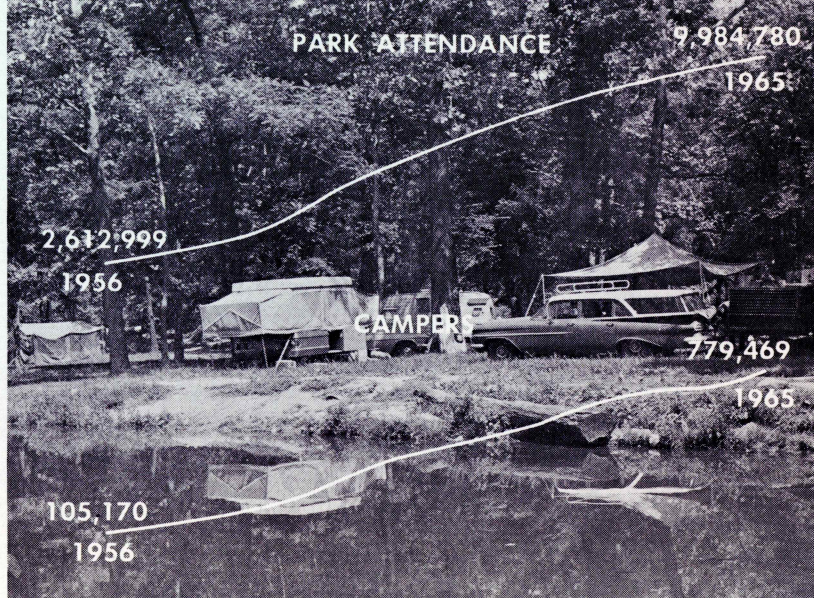

This is a typical Superintendent's residence which

was constructed in one of our newer parks.

Missouri's State Parks are noted for their excellent overnight camping areas and facilities.

Nature hikes are enjoyed by all ages when accompanied by the Park Naturalist.

NATURALIST PROGRAM

A general program is underway to convert each museum into an interpretative center that will reflect the personality of the particular park in which it is situated. The system will be expanded as sufficient funds for employment of trained student naturalists and proper interpretative center buildings become available.

A student naturalist was in charge of each of the four museums open during the 1965 park season, and was responsible for the evening movie program, nature talks and hikes. The following figures indicate trends in visitor participation among the various activities offered through the Naturalist Program:

	1963	1964	1965
Nature Museum Visitors	35,914	42,622	50,662
Nature Hikes	2,383	2,480	3,001
Movie Attendance	7,743	12,093	15,448

HISTORICAL PROGRAM

Within the Historical Program, expansion and improvements are a steady process. When one reflects back on the increased number of historic sites in the last eight years, it is a record of which to be proud. In 1957 only Arrow Rock Tavern was available as a historic house museum. The program is relatively new, and there is a definite indication of increased interest

The new dining lodge and cabins financed with revenue bonds were completed in Montauk State Park. These are excellent additions to this beautiful park.

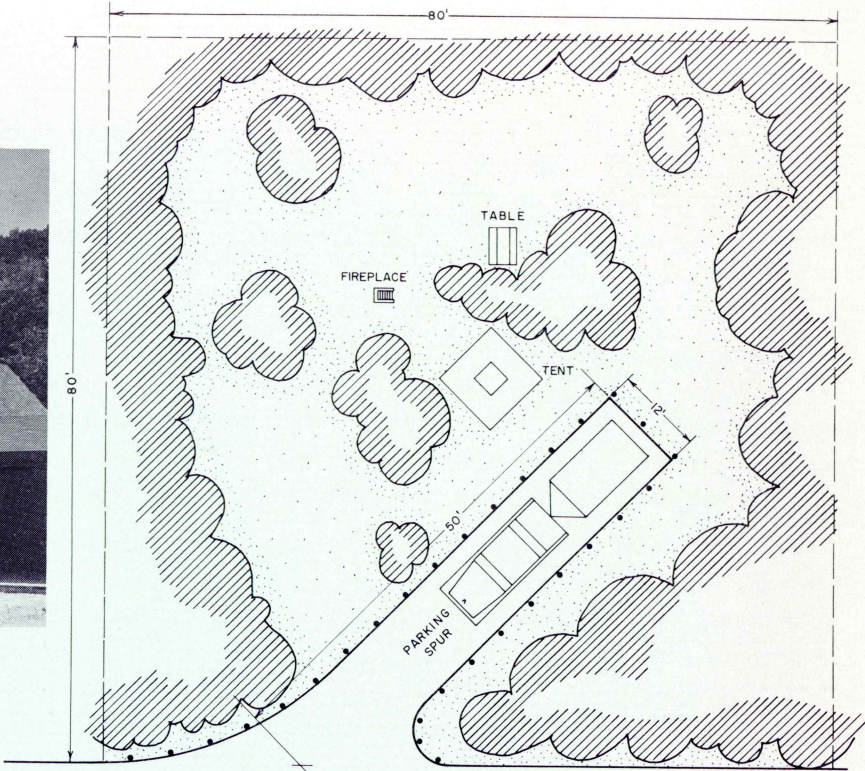

among our citizens in relation to their historic heritage. This interest is reflected in the following figures:

	1958	1959	1960	1961	1962	1963	1964	1965
Arrow Rock Tavern	9,232	7,480	8,813	12,643	12,285	13,138	12,624	12,011
Truman Shrine	1,157	16,585	14,139	13,481	14,851	14,846	18,921	21,239
Anderson House		3,297	7,855	9,296	9,292	11,723	14,376	14,137
Mark Twain Shrine			12,715	10,798	10,422	10,549	10,132	10,228
Pershing Shrine			2,327	1,731	1,190	1,466	1,709	1,500
Watkins Mill								1,705
TOTAL	10,389	27,362	45,849	47,949	48,040	51,722	57,762	60,820

The above figures do not indicate the entire story for several historic sites and buildings do not maintain attendance records. Those sites not having records would include Boonslick, Confederate Cemetery, Dr. Hall House and Bingham House in Arrow Rock, and the First Missouri State Capitol in St. Charles.

What can one say of the historic sites that have been a part of the Missouri State Park Board program for several years? There have been no dramatic changes or sweeping improvements, except a steady upgrading of furnishings and museum exhibits. An increasing proportion of the time available to the various curators is used for maintenance and visitor orientation.

Watkins Mill, the most recent historic acquisition, was opened from November 2 until December 15, 1965, and will open permanently on June 1, 1966. It is planned for this early Missouri plantation to become an outdoor farm museum as well as a museum of the woolen mill and Watkins Home.

This type of campsite is being planned for all of our Missouri State Parks.

PLANNING

Increased camping is one of the most significant trends in outdoor recreation. And it is one of the most beneficial and appropriate uses of state parks. However, as a result of the popularity of this type of recreation, camping in the "wilderness woods" has been replaced by camping in the "wilderness of tents." The result has been the overuse, misuse, and desecration of our natural and scenic areas, the attraction tourists find most inviting.

There is the constant problem of balancing the provisions of facilities for public use, such as camping areas, with the preservation of natural conditions. Obviously, parks are intended for human enjoyment but there is always the danger of development which will promote overuse, so the satisfactions sought by many are lost to all because of excess development and use. The fact that a park is popular is not a good reason for developing it beyond its carrying capacity.

To maintain this balance we must have proper planning on the location and layout of our camping and public use areas. The location of camping areas away from scenic areas will stop the unintentional destruction by overuse. The first principle of layout should be to confine vehicles to the road and campers to an individual campsite (see sketch).

All future development in our state parks will follow the plans as designed by our Landscape Architect and Park Planner. Our parks must not be so developed that the natural beauty of an area will be destroyed, but conserved for future generations to enjoy.

PUBLIC INFORMATION

In an effort to acquaint the people of Missouri with their state parks, we had on display the State Park Board Exhibit during the Kansas City Boat, Sports and Travel Show and the Midwest Sports Show in St. Louis—each with an attendance exceeding one hundred thousand. The Missouri State Park Board Exhibit is one of the most popular booths in these two Shows. The public is very much interested in obtaining all of the information possible about the facilities and features in our state parks.

The total distribution of literature by the Missouri State Park Board includes 200,000 general brochures and approximately 25,000 individual folders on parks and historic shrines annually. These are distributed through personal contact, mail, and travel organizations. The Director and various staff members made numerous talks and prepared articles for park, recreation, and historic publications.

The state park motion picture entitled “The State Parks of Missouri” has proven to be very popular. Since its release in January, 1958, it has been projected 2,005 times to an audience of 160,154. For the year of 1965, it was projected 163 times to an audience of 20,539.

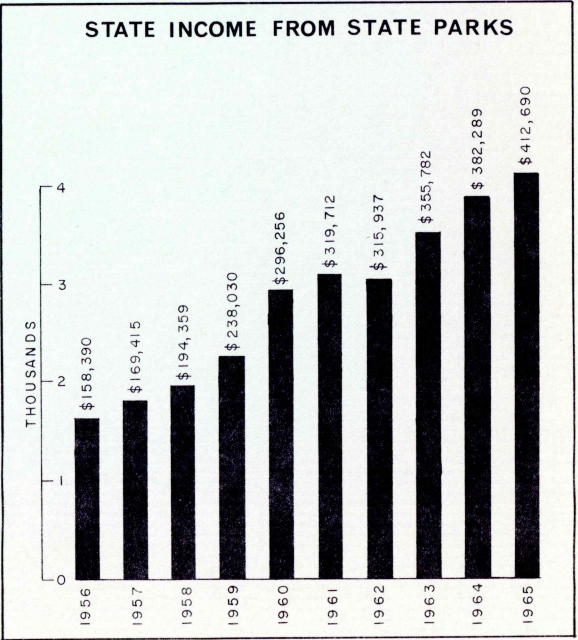

The film entitled “Camping For Everyone,” which is in full color and sound, was released to the public on January 19, 1962. All photography for the film was taken by our staff photographer in our state parks. It has been well received by schools, family tent camping, group camping, and civic organizations. Since its release, the film has been projected 359 times to an audience of 38,358. For the year of 1965, it was projected 49 times to an audience of 3,286.

FISCAL

The Concession Inspection Program initiated in 1960 was enlarged in 1965, as recommended by the Little Hoover Commission. A full time Concessions Supervisor joined the staff of the Missouri State Park Board, and will be responsible for the proper operation of all concessions. His services will be a valuable asset in the operation.

The Property Inventory of the Missouri State Park Board was maintained up to date during the year of 1965. An actual physical inventory was made at 33 parks and 4 historic shrines. Spot-checking of field property records was done in other parks. Spot-checking of field records is done to insure good property record maintenance in the field.

The Surplus Property Program, which was begun in 1960, was continued in 1965 with noticeable savings. This was done in conjunction with the continued service area cleanup program to make the service areas more presentable and safe.

MISSOURI STATE PARK ATTENDANCE FOR 1965

Park	Overnight Campers	Organized Group Camper Days	Cabin and Hotel Guests	Day Visitors	Total
